Chikukwa Business Centre

Proposed Site

Chikukwa Ecological Land Use Community Trust

The chosen site sits between two important nodes in Ward 11. The first is the business Centre which plays host to a variety of conferences and events for local companies along with companies internationally. The second node is that of the Ecological land use community trust. This holistic center looks at A "vision for change" that attracted the people of Chikukwa communal area in Chimanimani District in Zimbabwe to participate in the Permaculture movement as early as 1991. In this high rainfall area, water was still a problem, because the mountainous, over-grazed and deforested land caused high run-off, erosion and flooding, which always left the community impoverished.

Being in between these two attractors on non-contested land makes this site perfect for the park of seed sovereignty. Just 1km from the boarder with Mozambique, This location should promote the exchange of seeds and organic good across boarder.
